PARKEVILLE HYDROPATHIC INSTITUTE

PARKEVILLE HYDROPATHIC INSTITUTE.

A T a meeting of the Board of Managers of the Parker ville Hydropathic Institute, held fifth month 15th, 1850, Joseph A. Weder, M. D., was unanimously elected Resident Physician in the place of Dr. Dexter, resigned. Having made various improvements, this institute is now prepared to receive an additional number of patients; and from Dr. Weder's well-known skill and practical experience in Europe, (acquired under Vincenz Preissuits, the founder of the Hydropathic system,) and for several years past in this country, and particularly in the city of Philadelphia, (where he has had many patients,) the Managers believe the afflicted will find him an able and an attentive physician. tentive physician.

The domestic department being under the charge of a teward and Matron, will enable the Doctor to devote to

ents whatever time may be made to cation for admission to be made to SAMUEL WEBB, Secretary

Application for admission to be made to SAMUEL WEBB, Secretary.

Office No. 58 South Fourth street, residence No. 16 Logan square, Philadelphia.

General Description of the Furkeville Hydropathic Institute. The main building is three stories high, standing back from the street about one hundred feet, with a semicircutar grass plot in front, and contains thirty to forty rooms. The grounds around the house are tastefully laid out with walks and planted with trees, shrubs, &c. On the left of the entrance to these grounds is a cottage containing four grouns, used by male patients as a bathing house, with every convenience for "packing," bathing, &c.; on the right of the entrance, about two hundred feet distant, stands a similar cottage, used by the ladies for similar purposes.

stands a similar cottage, and the purposes.

In the rear of the Institute, at the distance of one hundred feet, are three other cottages, some eighty feet apart One of these is the laundry, with a hydrant at the door; the other two are occupied by the servants.

The hydrant water is introduced into these cottages as well as into the main building, and all the waste water carried off by drains under ground.

Consist of a circular stone building, standing on the brow of a hill, surmounted by a large cedar reservoir containing five hundred barrels, brought from a never-falling spring of pure cold water in the side of the hill, by "a hydraulic ram," a self-acting machine of cast iron, that is kept constantly going, night and day, by the descent of the water from the spring. The surplus water is carried from the reservoir to a fountain in the water water, yard, surroinded by weeping willows. In the first story of the waterworks is a circular room, containing the douche bath, which is a stream falling from a height of about thirty feet, and can be varied in size from half an inch to an inch and a half in diameter. Adjoining the douche room is a dressing room, with marble tables, &c.; the rising douche (for the cure of piles, &c.) is one of the most complete contrivances of the kind, being entirely under the control of the patient using the same.

There are many other appliances, which can be better understood by a personal examination.

NEW PICTORIAL WORKS,

Just published by R. SEARS, and for sale at No. 128

Nassau street, New York.

A MERICAN GIFT BOOKS FOR 1851.—Agents are
wanted to circulate the following new and beautiful
works, (retail price, \$2 50 per vol.) A new and complete
PICTORIAL HISTORY OF CHINA AND INDIA; PICTORIAL HISTORY OF CHINA AND INDIA; with a descriptive account of those countries and their inhabitants, from the earliest period of authentic history to the present time. In which the editor has treated not only of the historical events, but also of the manners, customs, religion, literature, and domestic habits of the people of those immense empires.

The embellishments are about two hundred, and of the first order, illustrating whatever is peculiar to the inhabitants, regarding their dress, domestic occupations, their mode of agriculture, commercial pursuits, arts, &c. They are accurate, and each one has been made expressly for the work.

chaser may princy at a very liberal discount, when quantities of not less than twenty copies are ordered at one time.

THRILLING INCIDENTS OF THE WARS OF THE UNITED STATES;
comprising the most striking and remarkable events of the Revolution, the French war, the Tripolitan war, the Indian war, the second war with Great Britain, and the Mexican war; with three hundred engravings! Retail price, \$2 50 per yolume. Orders respectfully solicited.

SEARS PIOTORIAL FAMILY PUBLICATIONS are decidedly the best books that agents can possibly employ their time in supplying to the people of the United States. They are valuable for reference, and should be possessed by every family in this great republic. There is not a city or town in these United States, not even those of small importance, but contains many citizens to whom these works are indispensable. They are adapted to the literary wants of the Christian, the patriot, the statesman, and the domestic circle, got up in a superior style of art and workmanship; and are not only such books as will sell, but are such as an agent of good principle will feel free to recommend, and willing to see the purchaser again after they have been bought.

Our Phan.—The plan the publisher has so successfully carried out for several years, is the obtaining responsible men as agents, who are well known in their own countiles, owns, and villages, and have time and disposition to circulate good and instructive books among their neighbors and friends. Any person wishing to embark in the enterprise will risk little in sending \$25 or \$50, for which he will receive an assortment as he may direct, at the wholesale cash prices.

Enterprising and active men of respectability and good address, would do well to engage in the sale of the above volumes; and all postmasters, clergymen, book pediars, and newspaper agents, are respectfully requested to act as our agents. A handsome remuneration allowed to all who engage in their sale. For particulars address, post paid,

in their sale. For particulars address, pos ROBERT SEARS, 128 Nassau street, N. Y. paid, ROBERT SEARS, 128 nassau street, A. 1.

To publishers of newspapers throughout the United States:
Newspapers copying this advertisement entire, without
any alteration or abridgment, (including this notice,) and
giving it a few inside insertions, shall receive a copy of
any of our \$2 50 or \$3 works, subject to their order, by
sending direct to the publisher.

The Baltimore and Philadelphia Steamboat Company (ERICSSON LINE)

(ERICSSON LINE)

Have resumed their operations for the year with increased means of accommodating the trude between Philadelphia and Baltimore, in the most regular and expeditious manner, and at their former materially reduced prices, being, on dry goods, haldware, &c., only 10 cents per 100 pounds, and but half the price charged by other lines.

Persons wishing to avail themselves of the facilities and moderate prices of the Line, are advised to give explicit and positive directions for sending their goods to the Briesson Line, and they should be particular to possess themselves of the receipts which are invariably given for their goods. In those are stated the price charged for transportation; and it will prove a protection against the double rates exacted by other lines, who have no published rates.

Goods distlined for the West, South, or other places beyond Baltimore, forwarded promptly on the day of their arrival, with every care and attention, free of all charge whatever for this service, in the shape of commissions or otherwise.

New York—Goods shipped from New York, or other

whatever for this service, in the shape of commissions or otherwise.

NEW YORK.—Goods shipped from New York, or other places castward of that city, should be distinctly consigned to A. Groves, jr., Philadelphia, to insure their conveyance by this Line.

Freight to or from Baltimore, as above, 10 cents per 100 pounds. Coarse freights taken at still less rates.

The established character and known reputation of this company is an ample guarantee to those disposed to confide their property to the care of the company.

One or more of the company's boats leaves Philadelphia from the upper side of Chestnut street wharf every day, (Sunday excepted,) at 3 o'clock, arriving in Baltimore early next morning. Apply in Philadelphia to A. GROVES, jr., Agent,

No. 19 South Wharves, above Chestnut st.

In like manner a boat leaves Baltimore, daily, (Sunday excepted,) at half-past 2 o'clock.

AMERICAN TELEGRAPH THIRTY-SECOND CONGRESS.

Term commences March 4, 1851, and terminates March 4, 1853. The First Session opens on Monday, December 1, 1851.

SENATE The Senate consists of two Senators from each State. Since the admission of California, there are thirty-one States, represented by sixty-two Senators. The Senators who held over from the 4th of last March were forty-one, viz: eighteen Whigs and twenty-three Democrats. Of the twenty-one new Senators, three are yet to be elected from the following States:

California-Legislature Democratic. Connecticut-Legislature to be chosen in

Tennessee-Legislature Whig. SENATORS HOLDING OVER AND ELECT. Whigs in italic; Democrats in roman—those marked F. S. are Free-soilers or Abolitionists; U., those elected as Union men; S. R., those elected as Southern or State Rights men.

BY THE MORNING'S MAILS.

Explosion and Loss of Life.

BUFFALO, November 14,-The steam-boiler of White's edge-tool manufactory, in this city, exploded to-day. The factory was entirely destroyed by the explosion. The names of those scalded, whose lives are despaired of, are, James Kane, Peter Henderberger, and John Lorens. Five others were seriously injured. Forty men were employed in the factory, but fortunately about thirty were absent at dinner at the time of the explosion.

Meeting in Favor of Pardoning Irish Patriots. PORTLAND, Mr., November 14 .- A large and enthusiastic meeting was held here last evening, to petition the President of the United States to intercede with Great Britain in behalf of the Irish patriots, O'Brien, Meagher, and others. The address to the people of the United States, adopted at the meeting held in Baltimore, was read, and received with great favor. The mayor presided, and several most eloquent and patriotic speeches were delivered, and a petition adopted, which is being extensigned to-day by all classes of our citizens. Resolutions were adopted, calling on the friends of freedom and humanity in all the cities to second the movement started in Balti- might be made navigable for steamboats for more in behalf of the unfortunate Irish patriot Wisconsin Election.

St. Louis, November 15 .- L. J. Farwell, the Whig candidate for Governor, has a majority of 2,000 over A. J. Upham, the Democratic candidate. It is generally conceded that the Whige have carried both branches of the Legislature; the result, however, is not positively

The question of the introduction of the new banking system has been carried by a large majority. The Wisconsin Democrat says that four-fifths of the members of the Legislature are in favor of some kind of banking. An Unnatural and Horrid Murder of a Child by

its Mother.

MANCHESTER, N. H., November 14.—A young girl whose name is Kate Virginia Poole, an unmarried mother, was arrested here to-day on the charge of having yesterday murdered her infant child, nine weeks old, by throwing it out of a railroad car window whilst the train was in full speed. The unnatural occurrence, and the extreme youth and history of the unfortu-

nate prisoner, has of course created great ex-

citement here. Michigan Election.

DETROIT, Nov. 15 .- The Democrats have carried everything in Michigan, and it is regarded as a great Cass victory. Robert McLelland is elected Governor, and Calvin Britain, Lieutenant-Governor. The Whig party rallied under

For the American Telegraph. KOSSUTH. "Back-wounding calumny The fairest virtue strikes."—Shakspear T.

Tyrant and coward slave! Rail on! thou mayst not harm the good and brave!
As looks the sovereign mountain down, As smiles the rainbow o'er the tempest's frown, So looks and smiles the brave He stands secure, Goo's pyramid of truth! Scorning the rage of Time!

He smiles—an immortality of youth, Peace, joy, and love sublime, Is there!

When Freedom's fire descends upon the heart, The man no more is man!

He feels his sacred life is set apart:

He feels new hope, new power,

And from that rapturous bour He dares do all—that tyrants fear he can!

Circling the world, filuming all the air!

III. What giveth grandeur to the mountain proud? It is the envious, vain-aspiring cloud, That, stealing from the pestilential vale, Slow creepeth up—then, when its efforts fail To shroud the dauntless peak, How, like a coward arrogant and weak, Doth it descend in tears,

Back to its darkened den, its sluggish, base compeers IV. What giveth beauty to the rainbow's form? 'Tis that it shineth mid the sullen storm! Smiling as terrors cease, And prophesying peace!

Thou art the mountain tail, the rainbow thou!

Herald of Freedom to the sad Old World! Shame shall attend whoe'er would cloud thy brow Back on himself shall all his wrath be hurled-Stand he among the great, Or sit in royal state,

Beyond the sea—or here— No, my blest NATIVE LAND! thou art too dear, Too honored, even in a moment's dream That thus I think of thee! No son of thine so deeply damned may be! I'll not believe it! If, at last, there seem

Such on our happy shore— Call the false phantom "brother" nevermore! Let him accursed be, wherever found! Still let him live, still let him wander round The unfriending earth, Weeping with tears of fire his day of birth:

Or if he have companion—legends tell Of one to suit him well— Ahasuerus, wild with awful dread, Outcast, in search of calm-eternal clouds o'erhead MAYS COTTAGE, Washington.

[From the Philadelphia Pennsylvanian.]

The Valley of the Sierra Madre. BY ONE WHO HAS BEEN THERE. The recent revolutionary movements in the valley of the Sierra Madre give an interest to that section of country, to the American people, which it did not before possess. The late successful outbreak there indicates that, ere long, that region will be detached from the Republic of Mexico, and formed into a separate government. I purpose, therefore, to give a short account of this valley, in order that the public may have a better knowledge of the district of country where these interesting events

are taking place.

The valley of the Sierra Madre embraces a part of the eastern and northern section of Mexico, and borders on the gulf of the same name. It lies between 23° and 28° of north latitude, and is bounded as follows: North by the Rio Grande, which separates it from the State of Texas; East by the Gulf of Mexico and Rio Grande; South by the States of Vera Cruz, Queretaro, and Guanajuato; and North by Za-catecas, Durango, and Coahuila. The natural boundaries of this region are very strongly hood not less than one thousand acres of land separate republic.

There is a water boundary on the North and East, and on the West a chain of high and rugged mountains run in a south-eastern direction, and are passable for carriages only at one point-near the city of Monterey, where there is a remarkable pass in the direction of Saltillo, called La Rinconada. Nature seems to have rent this bold chain asunder at some past time, in order to form a passage from the valley to the upper country. There is only a single wagon road, more than forty miles in length, bounded on each side by high mountains, and in many places the pass is less than fifty yards At the eastern end of this pass is situated the city of Monterey, and whoever holds this point has the key to the valley, since there is no other practicable route all the way down to the Gulf coast. In addition to the passage for wheel-carriages at Monterey, there s another point at which these mountains can be crossed, by pack-mules, and that is at the Tula Pass, about half-way between the former city and Tampico. This western ridge appears like a great barrier formed by nature to separate the low country from the people beyond, and is a strong bulwark of defence in that direction. On the south, the Panuco, a small river which empties into the Gulf of Mexico at Tampico, separates this valley from the State of Vera Cruz. It takes its rise to the west of San Louis Potosi, and, with some clearing out, some distance.

The valley of the Sierra Madre comprises three of the Mexican States, viz: Tamaulipas,

Nuevo Leon, and San Luis Potosi, with an area of seventy-five thousand square miles. Tamaulipas forms the eastern section, and extends along the Gulf coast several hundred miles, indented with numerous small bays and inlets, none of which afford good harbors. The largest town of this State is Matamoros, situated on the Rio Grande, about forty miles above its mouth by land, and much further to follow the windings of the river. It is nominally a place of about ten thousand inhabitants, and regularly laid out, but at present has gone some what to decay. It is one of the two ports of entry embraced in the contemplated republic, and has some commerce. In former times this intended to form a part of one of the columns of the portice of the east wing of the Patent of the portice of the east wing of the Patent of the portice of the diameter, four in height, of Mexico, and large sums of money were ex-pended to beautify and adorn it. Besides Matmoros, there are a few other towns in Tamaulipas of lesser note-namely, Victoria, in the vestern part, near the mountains, and one of the most beautiful places in the country; Mier, Camargo, and Reynosa, on the Rio Grande, and San Fernando, San Nicholas, Sota La Marina, and other smaller places in the interior. and other smaller places in the interior.

Nuevo Leon occupies the northwest corner, took on so. with Monterey for its capital; besides which, "Cause,' s there are Montemorelles, Linares, Caidareta, Cerralvo, China, and Santander—all inconsid-erable places. The situation of Monterey, which has become so widely known since its capture ant-Governor. The Whig party railied under has become so widely known and the month of Septemthe name of General Scott, and the Democrats by the American army in the month of September, 1847, is romantic and beautiful in the exand they darn't whip me.'

treme, and has always been considered the most delightful place in northern Mexico. It is built upon the eastern bank of the Rio San Juan, an inconsiderable stream here, which rises some distance higher up among the mountains. It is shut in on every side but one by rugged mountain ridges, whose gray peaks of stone tower far up into the heavens. To the west the main spur of the Sierra Madre rises up many thousand feet, running in a direction from northwest to southeast. This ridge has the appearance of to southeast. This ridge has the appearance of being a mass of rocks, and more than one-half of its eastern slope is entirely bare of vegeta-tion. On the right stands the Saddle mountain, solitary and alone in its grandeur, whose inac-cessible sides are covered with fine trees to its

cessible sides are covered with fine trees to its very summit; on the left, the Whale, in all its rugged deformity, and looking not unlike the great monster of the deep whose name it bears, rises up into the clouds—it seems like a sentinel sent there to preside over the destinies of the little paradise which lies at its base.

To the eastward the country stretches out into a level plain for some miles, which, with its villages, cornfields and "tangled wildwood," forms the city of Monterey. The city contains near fifteen thousand inhabitants, and is laid out with much regularity; the streets are generally straight, and cross each other at right angles, being paved with rough stones with erally straight, and cross each other at right angles, being paved with rough stones with narrow sidewalks. The houses are generally built of stone, one story high, with flat roofs, upon which many of the inhabitants sleep. The principal public buildings are the Cathedral, on the main plaza, which makes some pretensions to architectural beauty, a large Franciscan convent, college, market-house, prison, and several churches. A beautiful stone bridge spans a small stream which runs along the eastspans a small stream which runs along the eastern edge of the town, and in the northern suborn eage of the town, and in the northern sub-urb is a new cemetery, laid out a few years ago. Monterey is a place of considerable trade, and a large part of the merchandise, which seeks a market in the upper country, passes through this city, carried on pack-mules and in wagons. The immediate environs of this city are very picturesque, and cannot fail to charm every one who enters them. It stands in the midst of who enters them. It stands in the midst of beautiful shrubbery, which changes not its leaves and flowers the livelong year, and there are growing orange, lime, lemon, fig, date, and other trees of the tropies, loaded with an abundance of rich fruit. The approach in the direction of the Walnut Springs, for near half a mile, lies through this almost endless variety of fruit and flowers. The environs form a perfect labyrinth of rural beauty, and give a charm to the place which those who have never lived in tropical regions cannot imagine. Nature has been prolific to this region in climate, soil, and productions, which, combined, render it one of productions, which, combined, render it one of the most desirable dwelling-places in the world. [To be concluded.]

NEW RAILROAD FROM BOSTON TO NEW YORK On Thursday last the friends of the proposed 'Air Line Railroad' between New York and Boston assembled in great strength at Brewster Hall, New Haven, to discuss the feasibility of the project. About a thousand persons were present, consisting of deputations from New York, Boston, and places interested in the enterprise. One deputation of 400 was from Middletown, among whom was Mayor Skinner. The meeting was addressed by Professor Silliman, Mayor Skinner, and other distinguished speakers. Great enthusiasm prevailed. It is supposed that the road will be constructed forthwith. The time between New York and Boston will be reduced to six hours. Distance by the "Air Line" 225 miles.

marked, and seem to indicate an adaptation for are devoted to the culture of the grape for making wine. A writer in the newspapers says that on a visit to Mr. Longworth he saw 75,000 bottles of sparkling Catawha, and about 40,000 gallons of wine in casks varying from 40 to 50 gallons in each. This cellar is 120 feet long, 40 feet wide, and 40 feet deep; and it is the intention of the owner to increase it to double this size during the coming spring. Besides Mr. Longworth, there are many other persons in Cincinnati, and the neighborhood, engaged in the cultivation of the grape.

HEALTH REPORT.

OFFICE OF THE BOARD OF HEALTH,) Washington, Nov. 14, 1851. Interments in the city of Washington during the month of October, 1851.
